

End of Life (EoL) Notice

RealView Visual Workflow Optimization Software (RealView)

S.A.F.E. Situational Awareness for Everyone Display (SAFE)

February 1, 2024

Dear Valued Customers,

This is an official notice that the RealView Visual Workflow Optimization Software (RealView) and S.A.F.E. Situational Awareness For Everyone Display (SAFE) products have reached End of Life and are no longer supported by STERIS. The original notice of intent to end support on this date was delivered to Customers on February 1, 2019.

Products reach the end of their Product Life Cycle for several reasons. These reasons may be due to market demands and preferences, technology innovation driving changes in the product, or the products simply maturing over time and becoming difficult to keep updated and efficiently supported.

We believe that enhancing our operating room integration system platform, by building popular elements of RealView and SAFE into its intuitive workflow, will provide a more seamless patient care environment. So, we're continuously looking for ways we might integrate select features of the previous enterprise software products into our integration systems and provide a more efficient and cost-effective clinical solution.

This EOL notice does not apply to any product, software, or service from STERIS other than RealView and SAFE. If you have any questions or concerns, please reach out to your local STERIS account manager.
